Re: Permit By Rule Status
097-17315-00448
Plant ID #: 097-00448

Dear Ms. Russel:

A Permit By Rule request letter from Lone Star Industries, Inc. was received on March 4, 2003. Based on the data and information submitted, and the provisions of 326 IAC 2-10 (Permit by Rule), the Lone Star Industries Indianapolis Terminal (owned by Lafarge Corporation, operated by the Lone Star Industries, Inc.), consisting of three (3) silos, each with capacity of 375 tons of cement storage, with cement transferred to the silos from railcars and bulk trucks, located at 1112 Thompson Road, Indianapolis, Indiana 46290, satisfies the criteria to operate under the Permit by Rule provisions.

The emissions calculations submitted by the Lone Star Industries, Inc. indicate that actual emissions are below 20% of major source thresholds.

Pursuant to 326 IAC 2-10 (Permit by Rule), this source shall comply with the following conditions:

- (a) The source's total actual emissions for every 12-month period shall be limited to less than 20% of any threshold for a major source of regulated air pollutants [326 IAC 2-10-3(1)].
- (b) The source shall not rely on air pollution control equipment to comply with the above-mentioned limitations [326 IAC 2-10-3(2)].
- (c) Pursuant to 326 IAC 2-10-4 (Demonstration of Compliance), no later than thirty (30) days after receipt of written request by the Indiana Department of Environmental Management (IDEM), Office of Air Quality (OAQ), City of Indianapolis Office of Environmental Services (OES), or U.S. Environmental Protection Agency (EPA), the source owner or operator shall demonstrate that the source is in compliance with the above-mentioned conditions.
- (d) Compliance demonstration shall be based on actual emissions for the previous 12 months and may include, but is not limited to, material usage or production records. No other demonstration of compliance shall be required [326 IAC 2-10-4].

This source is hereby notified that this Permit by Rule approval does not relieve the source of the responsibility to comply with the provisions of any applicable federal, state, or local requirements, such as New source Performance Standards (NSPS), 40 CFR Part 60, or National Standards for Hazardous Air Pollutants (NESHAP), 40 CFR Part 61. [326 IAC 2-10-5].

Continued on Page 2

Any change or modification which will alter operations in such a way that the source will no longer comply with 326 IAC 2-10 (Permit by Rule), must obtain an appropriate approval from the OAQ and OES under 326 IAC 2- 1.1, 326 IAC 2-2, 326 IAC 2-3, 326 IAC 2-7, 326 IAC 2-8, or 326 IAC 2-9 before such change may occur.

This source may at any time apply for a state operating permit under 326 IAC 2-6.1, a Part 70 permit under 326 IAC 2-7, a FESOP under 326 IAC 2-8, or an operating agreement under 326 IAC 2-9, as applicable [326 IAC 2-10-1(b)].

Any violation of 326 IAC 2-10 (Permit by Rule) may result in administrative or judicial enforcement proceedings under IC 13-30-3 and penalties under IC 13-30-4.

Sincerely,
